Making online presentations for sharing work

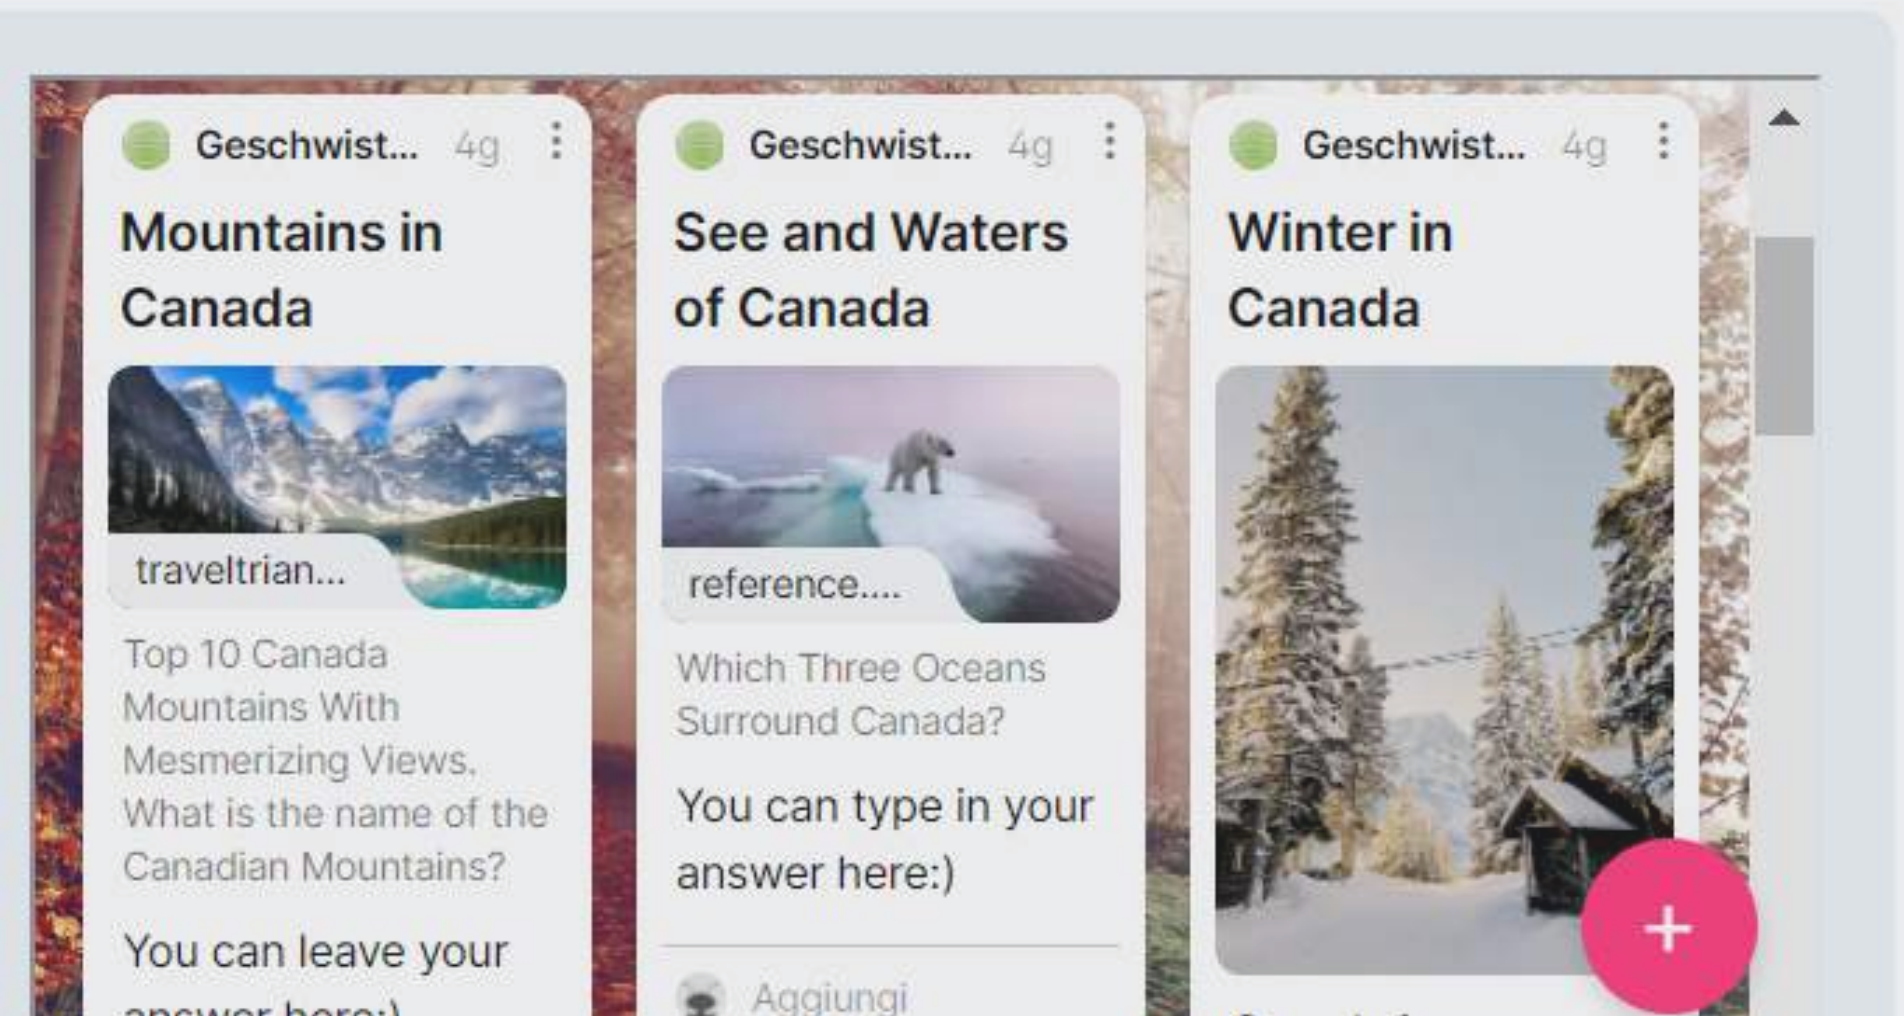

Bangkok

Bangkok is the economic heart of Thailand. Almost six million people live in the city and another eight million around it. The city has grown very quickly over the last 40 years in a chaotic, unplanned way. It is a frenetic place, a centre of international commerce and a major tourist attraction in itself.

Egypt location

Egypt is situated in the northeast corner of Africa and southwest corner of Asia. It is bordered by the Mediterranean Sea to the north, Palestine and Israel to the northeast, the Red Sea to the east, Sudan to the south, and Libya to the west. The Gulf of Aqaba in the northeast, whose maximum width is 24 km (15 mi), separates Egypt from Jordan and Saudi Arabia. Cairo is the country's capital and largest city.

Mixed Group Work

COLLABORATION

onders of the World -

WHAT STUDENTS SAY

A student from Turkey

This e twining project was very fun and beautiful. I think this project was informative. I would like to thank all the teachers for managing this beautiful project

A student from Germany

It was fun! I really liked the project and i hope we could do more of these. I learned much and i never did a project like this before! It was very exciting. I really liked it.

A student from Croatia

This project was great, I really enjoyed it! I especially liked when we worked together in international teams and played Kahoot quiz. I also found something about traditional sports in different countries from all over the world.

A student from Italy

I'm really happy with this project. I found it very interesting to participate in video calls with other people who don't speak my language, so I had to speak in English. I preferred group activities, for example when my class and I did a poster presentation on Thailand. I learned new things: how to work with other students in other countries only in English, make presentations in English... The project helped me to speak with people who don't know my language. Now that the project is nearly finished I'm happy to have participated in this project because I learned a lot of new things.
